—The meeting of the Missionary Society of the Presbyterian church, held Wednesday afternoon, was well attended. Supper was served to a considerable number.

—The initiatory degree will be con-ferred at the meeting of Canfield Lodge, No. 155, I. O. O. F., next Wed-mesday night. Refreshments will be served following work.

-Ezra Welsh, former distiller at New Middletown, has struck it rich in his Oklahoma oil field, a 7,000 barrel well having been drilled in last week, which means millions for Ezra if the well keeps up anything like that yield for even a year.

-Thieves raided the garden of Mrs. Emeline Platt on East Main street the other night, pulling up potato vines, and after removing the tubers, replaced the vines in growing position to give them the appearance of not having been disturbed.

-There seems to be a disposition just at this time to neglect the park about which so much was said and one only a few short weeks ago. Limbs broken from trees by wind storms and paper and other litter are scattered over the park in wild pro-

-The second week of school finds everything going nicely in every build-ing and grade. Some of the rooms are considerably crowded, but the teachers are making the best of the situation. It is likely a new building will be ready for use next year and consolation is found in this fact.

—Rev. C. L. Cope was assigned by the North East Ohio conference to the pulpit of the Canfield M. E. Church to succeed Rev. R. S. Smith. Mr. Cope the past year was pastor of the Wilson Ave. M. E. Church, Youngstown. He arrived in Canfield Thursday after-noon with his family and household

-The Mahoning Supply Co. has purchased of A. K. Osborn and H. A. ehman five acres of land lying along the Erie railroad a short distance north of the Ellsworth-Canfield highway on which it will erect a large warehouse and supply station. It will probably be several weeks before work is started on the structures.

-Rain fell much of the day last Sunday, but that fact did not keep automobilists off the road. In the afternoon especially, hundreds of machines passed through the village, the occupants bent on having an outing, seem ingly not caring a rap about the rain can go in any direction over improved

-The nation-wide strike of iron and steel workers started Monday on nedule and all the plants in Youngstown, Girard, Niles, Warren and many other cities are closed down with no prospects of either workmen or operators yielding from positions taken before the strike became effective. It promises to be a contest the final nature of which no man can fore-

-Late last Sunday afternoon, while Mr. Edward Miles and family of Girard were driving along the road near the residence of M. M. Clay, just north of Toot's Corners, in a Ford edan, a Salem man passed, and cutting in ahead too quick, caught the front wheel of the sedan, breaking it and bending the axle and steering gear, causing the machine to all but the road. Fortunately Mr. Miles was running slow and quickly brought the car to a stop, and this probably saved the occupants from serious injury.

-Edwin Taber of Alliance, formerly of Canfield, and Miss Lucile Stockwell of Garretsville were united in marriage September 17 at the home of the bride, the ceremony being performed by E. S. Rathrock of Cleveland, who ficiated at the marriage of the bride's parents 29 years ago. The happy couple spent their honeymoon at the Ellsworth lake, frequently coming to Canfield. Wednesday they left for Alliance, where the groom holds the position of paymaster with the McCaskey Register Co., one of the most important industrial concerns of

—Rev. Welty J. Wilson, former pas-tor of the local M. E. Church, now superannuated and residing at Atwater, occupied the pulpit of the Canfield church last Sunday morning and was greeted by a large number of ormer parishoners and old friends. He came here from the North East Obio Conference in Youngstown. Nearly a half century has elapsed since he preached here, but he has lost none of his vigor despite increasing years. He is strong of voice and deep in thought and none of the younger generation of ministers have anything on him. In song he is a leader now as in an elder day. It was a real treat for Canfield people to have him with them last Lord's Day.

-While Mr. and Mrs. Merle Camp of Youngstown were returning home from a visit in Rochester, Columbiana county, last Sunday afternoon in a Carnation speedster, accompanied by Lianna Sinmich, 13-year-old sister of Mrs. Camp, the steering rod of the ma-chine broke about two miles north of Greenford and the car left the road, Greenford and the car left the road, plunging into a ditch, striking a tree and throwing out the occupants. The little girl had her right leg broken near the ankle, the bones protruding through the flesh. She was brought to Canfield by a passing automobile and given surgical attention by Drs. Campbell, later being removed to the Youngstown hospital, where she is reported to be setting along very well. reported to be getting along very well.

Mrs. Camp was somewhat bruised, but
her husband escaped injury. All were
thoroughly plastered with mud when
hurled from the machine.

The small home can frequently be heated by one stove. Get Cole's High Range and both cook and heat.

NEIGHBORHOOD NEWS

-Postmaster Higby of Garretswille has resigned on account of failing health. A civil service examination was held Wednesday in Warren to fill the vacancy.

—The old Porter grist mill in New-ton Falls burned last Friday night, causing a loss of only \$2,000, as in recent years it had been used only for storage purposes and a roosting place for weary, wandering tourists.

-Prof. B. S. Dean of Hiram, well known in Canfield, where he first saw the light 75 years ago, and has numerous relatives in this neighborhood, died Tuesday in a Cleveland hospital where he under went a surgical operation last July. Death resulted from uraemic poisoning. For many years he was an instructor in Hiram College, being a finished scholar. His widow and two children survive him. Funer-al services will be held in Hiram at 1:30 Friday afternoon.

R. K. M. DRYING SEED CORN INSURES GOOD STAND

Tests in caring for seed corn at the Ohio experiment station show that corn giving the best germination tests in the spring is that which has been dried out well in the fall and to which some artificial heat has been applied. It is necessary to keep the corn wellventilated, which may be accomplish-ed by suspending the ears from a wire in a shed or attic; or the ears may be placed in a sling between two strings so that they do not touch each other. If the corn is thoroughly dried before freezing weather the germination test generally proves satisfactory in the

Abundant Proof That Deceltful Acts Are Accompanied by Conscious.

In military stables horses are known to have pretended to be lame in order to avoid going to a military exercise. A chimpannee had been fed on cake when sick. After his recovery he often feigned coughing in order to pro-

ness of Wrongdeing.

The cuckoo, as is well known, lays its eggs in another bird's nest, and, to make the deception surer, it takes away one of the other bird's eggs. Animals are conscious of their deceit. as is shown by the fact that they try to act secretly and noiselessly; they show a sense of guilt if detected; they take precautions in advance to avoid discovery; in some cases they manifest regret and repentance. Thus, bees which steal hesitate often before and after their exploits, as if they feared punishment.

A naturalist describes how his monkey committed theft. While he pretended to sleep the animal regarded him with hesitation, and stopped every time his master moved or seemed on the point of awakening.

Arabian Physician. Then there is the Kitab-al-Mansuri of All Razi, the most eminent of the Arabian physicians, the Rhazes of European writers, of whom it is said that when in his old age he suffered from cataract and was asked to have his blindness removed by an operation, he replied:

"I have seen so much of the world that I am wearled of it."

Of whom also it is said that when called upon to select a site for a hospital in Bagdad, he caused pieces of meat to be suspended in various locellties, and chose that one in which, after a given time, the meat showed least putrefaction, thus anticipating the knowledge of microbal infection. To him it is said that we owe the oldest account extant of smallpox and measles.—Asia Magazine.

The newspapers haven't told you our most important event. The crickets have come, and are trilling away, each on his own book, and without unison, like an orchestra tuning its fiddles. This means that the curtain is going to rise for the entry of autumn. . . I said the birds had ceased, but I was wrong. The screech-owl is in season, and every night yodels mournfully about the house like a banshee. . . But the crickets have come, too, and are cheerful enough in their monotonous way. I venture to think they have told me the same thing before. But that makes them all the more like human society.-Lowell.
